

Taiwan Celebrated the World PT Day 2023

The theme for World PT Day 2023 is arthritis and the role of physiotherapists. Taiwan Physical Therapy Association (TPTA) responded to the theme and invited physical therapists and PT students in Taiwan to participate in this significant event of the year. Through true stories and videos, people get to know how one's life can be affected by arthritis and how physical therapist can help!

For students, a video creativity competition was held. Students used creative ideas to make videos about what PT is, including scope of service, workplace, physical therapy assessments and treatments, and common myths about physical therapy. All submitted videos were posted and shared on social media, including Facebook and YouTube, to increase people's understanding of physical therapy profession. The top four videos with the largest numbers of 👍 were awarded.
