All India Institute of Physical Medicine and Rehabilitation, Mumbai, India.

Report on: Awareness Program for General Public On “Physiotherapeutic Management and Prevention in OA Knee”

On the occasion of “World Physiotherapy day- 2022”, Department of Physiotherapy, AIIPMR, Mumbai ,India, organised awareness program for general public on prevention and physiotherapeutic management in OA knee.

Frequently asked questions were identified on above mentioned topic 45 days prior for pain management section of physiotherapy department .These questions were collected in order to answer them and have an open discussion on these questions on WPT day.

On 8th September, the event took place in morning 10.00 am to 12.00 pm. It was an open event and was attended by patients, relatives and staff members of the institute. A seminar was held for undertaking OA Knee as a condition in details. It was explained bilingually in Hindi and English. Following seminar, interactive session was held with general public and queries were answered. The session ended with a need expressed by organisers for feedback and if any other topic was needed to be discussed in future. Feedback was received from patients where session was found to be very resourceful and informative.
