Report on World Physiotherapy Day on 8th September 2020

I find great pleasure and proud in reporting about the World Physiotherapy Day 2020 .

We all know that WHO has declared the COVID-19 outbreak a global pandemic as the novel corona virus continues to rapidly spread worldwide

AIIMS Patna (Bihar) has been designated as dedicated COVID-19 Hospital. It has been declared center of excellence and Institute is providing best possible health care services to patients admitted here.

Fighting COVID-19 is a team approach and physiotherapy plays a pivotal role in treating Covid positive patients. As a physiotherapist we are playing our part and giving best possible physiotherapy services to all patient who are admitted in Intensive care unit or wards. We are doing rehabilitation in acute setting, Post acute and set long term rehab for all patient as per WHO/ICMR /WCPT/PAHO (Pan American health organization) guidelines. Safety of health care professionals is foremost and We are following all IPC (infection ,prevention & control) protocols.

We had made patient and general population aware about the role of rehabilitation during and after Covid 19 illness.

On the occasion of world physiotherapy day according to theme given by WCPT, I have made a small video on theme "Rehabilitation after Covid-19 Illness". This is creating awareness and helping quarantined and discharged COVID patients to exercise and get benefited within the confines and friendly environment of their home.

I am sharing the link of this video in this report.

Thanks & Regards

Reena Srivastava
Senior Physiotherapist
AIIMS Patna
