

Dalia Woznica, PT, PhD

A physiotherapist with 15 years of clinical experience in the field of children spine deformities and posture failures. With a special interest in Hypermobility Spectrum Disorders. Expert in the area of international cooperation by the Polish Chamber of Physiotherapists. Member of the Polish Council of Physiotherapists. Scientifically, engaged in studying the global PT markets and their dynamic development. Co-owner and a manager of the neurocentrum medical clinic in Gdansk. Chair at regional Association of Polish

Physiotherapy.

Graduate from physiotherapy at the Medical University of Gdansk and Postgraduate studies in Management of Medical Entities. Lecturer at Medical University and a course leader in scoliosis physiotherapy.

I apply for the election of a board member being aware of the duties and responsibilities. My voluntary work as a Member of the Polish Council of Physiotherapists has taught me, how important it is to be flexible and available when it comes to unexpected work. It is not always easy but with the passion and advocacy possibilities, the effort is visible. I am easy with organisational actions, like to cooperate with professional events. During COVID-19 pandemic, being a part of a crises team I learned to work under stress and I was engaged in organizing the global support for physiotherapists. I hope you consider my candidacy.
