

## Call for late-breaking abstracts

Submission: 25 January-3 February 2023

### Submission guidelines

Please read this information carefully before proceeding to the online submission form

---

#### Submission process:

Apply on the congress website: <https://wp2023.world.physio/#/programme/abstracts>

#### Important dates

Submission opens	<b>25 January 2023</b>
Submission deadline	<b>3 February 2023</b>
Notification of outcome	<b>March 2023</b>

#### Late-breaking abstracts

This is an opportunity to submit your most recent research and have the insights presented at World Physiotherapy Congress 2023 in Dubai.

In the submission system you will be asked when your project has been completed to ensure the most recent research is identified. Successful abstracts will be scheduled in specific late-breaking abstract platform presentation sessions if they meet the high standard of scientific merit for this category.

All other abstracts that are submitted and do not meet the criteria of late-breaking will be reviewed and considered by the congress programme committee but will be scheduled as poster presentations and will not be included in the abstract presentation awards selection.

Abstracts are invited that:

- report on the latest research with original scientific data [this includes systematic/narrative reviews and meta-analyses]; submissions with pending results and study protocols will not be accepted
- address new and unique developments in practice, theory, education, management, policy, and resources
- describe innovative ways in which established methods have been adapted to meet the changing needs of practice.

---

## Presentation format

Abstracts are presented either as a platform or poster presentation. Platform presentations will be recorded and all platform and uploaded poster presentations will be available on-demand through the congress platform, after the in-person congress in Dubai.

**All poster and platform presenters are required to attend the in-person congress in Dubai and can register using the discounted presenter rate. Terms and conditions apply.**

## Platform presentations

Each platform presentation is scheduled for eight minutes plus two minutes for questions.

## Poster presentations

- **Printed poster presentations** are grouped by topic within the poster area. Presenters have a designated presentation time during the lunch break onsite for discussion with participants. There is a limitation on the number of printed posters that can be accommodated.
- **ePoster presentations** will be scheduled in the programme and grouped by topic. A chair will lead live discussions at congress between onsite presenters and participants, with posters on electronic screens.

**The decision of which format to assign to any abstract rests with the congress programme committee.**

## Selection criteria

Submitted abstracts will go through a blind peer-review process carried out by international reviewers.

The following principles will be used to review late-breaking abstracts:

1. Has the project been completed since September 2022?
2. What is the reason that the abstract is late-breaking?
3. Does the report address a "significant" or "important" issue?
4. Do the methods/approach enable the question to be answered rigorously?
5. Have the data/findings been interpreted appropriately?
6. Are the contents of the abstract clear and logical?

## Submission guidelines

**All correspondence will be with the person who submits the abstract online. The presenting author does not have to be the first named author listed in the abstract and will be identified through the submission process.**

The online submission form will provide restricted space for data entry, the available word count is indicated below, and the system will impose the limit.

**You will be asked to provide the following:**

1. Preferred presentation format.
2. Fit with congress topic area(s).
3. Title of abstract [maximum 20 words].
4. Completed abstract [maximum 500 words]. Abstracts will be included in the congress proceedings and must be structured using the headings below.

Heading	Notes
1. Background:	What was the context for the study/project? Why was it important that this project was undertaken?
2. Purpose:	What was the major reason for undertaking the project? (A project may be a research study, developing a new or adapted programme, method, theory, or resource). Any secondary objectives?
3. Methods:	What principles, methods/methodological approaches, materials did the project involve?
4. Results:	Summarise the main findings from the analysis.
5. Conclusion(s):	What can be concluded from the study? What are the suggestions for future work?
6. Implications:	What are the implications of the project and how will the results be translated into physiotherapy practice/management/education/policy.

**No** images, tables or graphs are permitted. References are not required in the abstract.

- Keywords: use up to three words to describe your work which are supplementary to the programme topic(s)
- Funding acknowledgements: please acknowledge all funding sources that supported your work. If the work was unfunded, please state this [maximum 20 words]
- Ethics approval [see general information point 11 below]: evidence that ethics approval was given is required. Please name the institution and ethics committee that approved your work or advised you that it was not required. Provide the ethical approval number or state the reasons why ethics approval was not required.

When submitting your abstract, you will be asked "Did this work require ethics approval?". If no, you will then be asked for the institution and ethics committee that advised you that ethics approval was not required and the reasons. You will be asked to upload supporting evidence.

Ethical approval is unlikely to have been required if your work:

- addresses new and unique developments in practice, theory, education, management, policy, and resources
- describes innovative ways in which established methods have been adapted to meet the changing needs of practice
- is a systematic or narrative review.

The Council for International Organizations of Medical Sciences (CIOMS) in collaboration with the World Health Organization has developed the 'international ethical guidelines for health-related research involving humans' which provide examples of exemptions from review (see page 90) <https://cioms.ch/wp-content/uploads/2017/01/WEB-CIOMS-EthicalGuidelines.pdf>

In these cases, please state N/A for institution and ethics committee, and complete the reason ethics approval was not required, giving as much detail as possible [500 words]

- Presenter details and biography of presenting author [200 words].
- Co-author details.
- Information concerning any presentations or publications of the work made prior to congress [50 words].

---

## General information

1. The congress language is English, and all proposals and presentations must be made in English. Translation will not be provided. However, we will use artificial intelligence tools to make presentations as accessible as possible.
2. A written abstract in English must be submitted for each proposed presentation.
3. It is the author's responsibility to submit a correct abstract. Any errors in spelling, grammar or scientific fact will be reproduced as typed by the author.
4. The topics selected will be used to inform the review, selection, and programming processes. Please choose the topic(s) which best describe the subject of your abstract that will attract the right audience to interact with you.
5. A person can only **present** a maximum of **two** abstracts. This includes the abstracts submitted through the regular abstract submission. They may be named as the presenting author on multiple **submissions** but will only be permitted to be confirmed as the **presenting author on two accepted** abstracts. The confirmation system will permit a change of presenting author on accepted abstracts. They may be named on other abstracts as a co-author. This excludes any submissions made and accepted as part of the call for focused symposia.
6. Only **one** presenting author per paper is permitted. Only an author may present the abstract. If no author is available onsite, the abstract will be withdrawn. Any changes to the presenting author must be notified directly to World Physiotherapy. Changes will be incorporated into the final programme if there is sufficient time, but thereafter no further changes will be reflected in the programme.
7. Notification of outcome will be sent to the submitter. Please note that only the person who submits the abstract online will receive mail concerning the abstract and is responsible for informing all authors of the status of the abstract.
8. All presentations must describe original work to which all the authors listed have made a significant contribution. Any reference to personal experience should be clearly labelled as such.
9. All proposals and presentations must adhere to the use of "people-first" language. A person must not be referred to by disability or condition, and terms that could be considered biased or discriminatory in any way should be removed (eg "person with a stroke" instead of "stroke patients"). See: [www.disabilityisnatural.com/people-first-language.html](http://www.disabilityisnatural.com/people-first-language.html) for more information and examples.
10. Any source of funding or support for the work being presented should be acknowledged.
11. All presentations including research on humans (patients, carers, students, faculty, staff, colleagues) or animals must provide evidence that the research was carried out ethically (ie ethics committee approval, informed consent by subjects). To check that your research complies with ethical principles, please visit <https://bit.ly/3gHtmB2><sup>1</sup>. See also the global international standards<sup>2</sup>  
  
The congress programme committee (CPC) expects the research to have been conducted in accordance with international principles.
12. Each abstract submission must indicate if the material has been or will be published, in any format, or presented at another national or international meeting prior to the World Physiotherapy Congress 2023.

---

Abstracts for previously published or presented work will only be considered if they are unlikely to have reached an international physiotherapy audience, and if the authors take responsibility for providing any copyright clearance needed for inclusion in the congress proceedings or other congress publications.

13. The author presenting the paper must register to attend the in-person congress and be available to participate in the programme at the time scheduled.
14. The scheduling of all presentations will be determined by the CPC to ensure best fit with the overall congress programme. Any requests for specific dates and times will not be considered. Similar abstracts in related topic areas will be grouped together for presentation.
15. PowerPoint presentation will be available in all congress rooms.
16. You agree to upload a pdf of a printed poster accepted for presentation so that it can be added to the on-demand content available post-congress.
17. There will be no display area provided for professional resource materials including computer-based programs, materials, and audio-visual resource presentations. It is expected that any resources or materials will have been designed/developed by the author(s) and **MUST NOT** currently be for sale commercially by the author(s) or another vendor. If featured, they must be included in the standard PowerPoint presentation or poster format.
18. Presentations will be recorded. Any recordings of PowerPoint presentations, or copies of posters made available online will be in PDF format; original PowerPoint files will not be published. Consent will be sought through the submission system.
19. Presentations are not permitted to market new products, equipment, or organisations, or use the presentation time to challenge or criticise competitors' products.
20. Presenting authors only will receive a certificate of presentation.
21. All presentations during the congress must include the same content and follow the same outline as described in the submitted and accepted abstract. Exceptions will only be allowed with written permission of the chair of the CPC.
22. In keeping with World Physiotherapy policy, no honorarium, fee, or payment of expenses will be paid to presenters.
23. All decisions of the CPC are final.

### Consent and permissions

In submitting an abstract you must confirm that:

- you accept responsibility for the accuracy of the submitted abstract and understand that the content cannot be modified or corrected after the submission deadline and that **it will be published exactly as submitted**
- all co-authors are aware of and agree to the content of the abstract and support the data presented
- all presenters have agreed to participate at congress, should the proposal be accepted for presentation, and take responsibility for their own travel, accommodation, and registration costs
- you accept responsibility as the contact person for all correspondence about the abstract and to share information with all authors about its status
- you consent to the session being recorded and made available by World Physiotherapy

- 
- you have secured any copyright/permissions clearance required relating to any previous presentations, equipment, or other material for inclusion in the World Physiotherapy congress, its proceedings or other congress publications
  - for all studies (including service evaluations and audits) involving human participants or animal subjects, permission has been obtained from the relevant ethics committee where applicable and properly informed consent given where appropriate both for the work completed and the intent to present
  - anyone who is identifiable in the abstract and presentation has given their consent to be included
  - the work is original, except for extracts from copyrighted works used with permission from the copyright holders, and it does not infringe upon any copyright, proprietary, or personal right of any third party
  - you have identified any potential conflicts of interest eg financial interest in products or processes described in the abstract, stock ownership, membership on an advisory board or board of directors, or other substantive relationships

## Copyright

On behalf of any and all co-authors, the submitter will confirm the:

- consent to have authors' names, affiliations and biographical materials used in connection with the publication of your work.
- content belongs to the author(s). However, if the abstract is accepted the submitter agrees, on behalf of all co-authors, to transfer and assign to World Physiotherapy free of charge, on a non-exclusive basis, the rights to edit, publish, reproduce, reformat, distribute in whole or in part the abstract and prepare all type of derivative works. These works may include press releases, recordings, and/or educational products, using all communication tools and means, now known or hereinafter developed, including any and all analogue and digital means and any and all supports or forms of media, now known or hereinafter developed. This includes use in indexes or search databases in print, electronic, or other media.
- author(s) retain the right, after presentation, to subsequently include the work in articles, books, or derivative works that they author or edit, provided said use does not imply the endorsement of World Physiotherapy.
- the author(s) will retain copyright of their abstract. However, the author shall only reuse, reproduce or post the abstract with acknowledgment to the initial and first publication or presentation at a World Physiotherapy Congress 2023 event, and therefore reference the name of the World Physiotherapy event and the date.

When completing the online submission process the submitter will be asked to confirm that the presenting author has read and understood the general information and the requirements they are expected to fulfil.
