ARGENTINA – ADVOCACY CAMPAIGN

As a result of advocacy by the **Argentine Kinesiology Association (AKA)**, physiotherapists in Argentina will be recognised as specialists by the ministry of health in four different areas: cardiorespiratory, intensive care, neurology, paediatrics and neonatology. This was passed by the Argentine government in December 2023.

As part of its advocacy campaign, AKA coordinated a commission to determine which physiotherapy specialties existed in Argentina. AKA then worked with representatives of universities, internship programmes, scientific societies, and AKA specialty groups to identify physiotherapy specialties in Argentina.

AKA presented the findings to representatives of the ministry of health and secured agreement about the criteria for certification and recertification.

Recertification will take place every five years, ensuring continuous professional development for physiotherapists in Argentina and providing the health authorities with an updated national database of physiotherapy specialists in the event of a health emergency.

DISCLAIMER

- The data in this report is based on responses to the annual membership census (AMC) sent to World Physiotherapy's member organisations.
- The AMC was sent to 127 member organisations, of which 119 responded, representing a 93.7% response rate. This is consistent with previous years' response rates and demonstrates strong engagement between World Physiotherapy and its member organisations. The census date was 30 June 2023.
- Some data in this report has been collated from other sources available to World Physiotherapy.
- If you have any questions or concerns, or want to make changes to the data for your country/territory, please contact membershipcensus@world.physio.
