

Celebrating World PT Day with an Unforgettable Journey into Human Anatomy! 🏠

A resounding round of applause to the College of Physical Therapy at San Juan De Dios Educational Foundation Inc.-College for crafting a truly extraordinary World Physical Therapy Day celebration! 🌟

On September 9, 2024, the Human Anatomy Museum Tour opened its doors, offering SJDEFI students and staff a spellbinding exploration of the human body. This event wasn't just about viewing exhibits; it was an immersive journey that sparked curiosity, deepened understanding, and celebrated the marvels of human anatomy. The event reached its zenith with a heartwarming Ribbon Cutting Ceremony on September 9, reflecting the unwavering commitment and enthusiasm of our future healthcare professionals.

A heartfelt thank you goes out to the Physical Therapy Students' Association and the exceptional leadership of Dr. Margie Abad-Buenavista and Dr. Edmund Martinez. Their dedication and innovative spirit turned this event into a spectacular success and a true testament to the power of teamwork.

The day was further enhanced by the PT Booth, where fresh pastries and creative stickers added a touch of sweetness and joy to the festivities. 🍪🍪 From the insightful tour to the engaging activities, every moment was a celebration of knowledge, community, and the shared passion for physical therapy.

Here's to the brilliant team that made this event possible and to the endless curiosity that drives the SJDEFI College of Physical Therapy! May the spirit of learning and discovery continue to inspire and elevate us all. Cheers to a truly memorable World PT Day! 🥂
