

HAPPY WORLD PT DAY! 🍷

On September 9, our Physical Medicine and Rehabilitation Medicine Unit proudly celebrated #WorldPTDay with a lecture on "Back to Basics: The Role of Physiotherapists in Managing Low Back Pain", provided free bone screenings to our valued patients as well as a simple gift giving.

We hope that our presentations, screenings and gift giving offer valuable insights, contribute to better health and provided happiness to our patients. A heartfelt thank you to our sponsors and the dedicated St. James Hospital Inc's physiotherapists whose effort made this event possible. Your support is crucial in our mission to enhance patient care and awareness.

Again, Happy World PT Day!
