

Call for abstracts South America regional conference 2026

Submission deadline: 14 October 2025

Submission guidelines

Please read this information carefully before proceeding to the online submission form

Submission process:

Apply on the conference website: [South America region conference 2026 | World Physiotherapy](#)

Important dates

Submission opens	14 August 2025
Submission deadline	14 October 2025
Notification of outcome	November 2025

Abstracts

Abstracts are invited that:

- report on the latest research with original scientific data [this includes systematic/narrative reviews and meta-analyses]; special interest reports and case studies can be submitted, submissions with pending results and study protocols will not be accepted
- address new and unique developments in practice, theory, education, management, policy, and resources
- describe innovative ways in which established methods have been adapted to meet the changing needs of practice.

The South America region conference's theme is **Science that drives, technology that transforms, and physiotherapy that connects.**

Whilst abstracts are invited on all topics across physiotherapy practice, education and research, abstracts in the field of innovation and technology are of particular interest for the scientific committee (SC).

Presentation format

Abstracts are presented either as a platform or poster presentation.

All poster presenters and platform speakers are required to attend the conference in person.

Platform presentations

Each platform presentation is scheduled for 10 minutes plus 5 minutes for questions.

Posters

Printed poster presentations

Authors have a designated presentation time during the lunch break onsite for discussion with participants. The area available to display printed posters will limit the number of printed posters that can be accommodated.

The decision of what format to assign to any abstract rests with the SC.

Selection criteria

Submitted abstracts will go through a blind peer-review process carried out by international reviewers.

The following principles will be used to review abstracts:

1. does the report address a "significant" or "important" issue?
2. do the methods/approach enable the question to be answered rigorously?
3. have the data/findings been interpreted appropriately?
4. are the contents of the abstract clear and logical?

Submission guidelines

All correspondence will be with the person who submits the abstract. The presenting author does not have to be the first named author listed in the abstract and will be identified through the submission process.

The submission form will provide space (limited by characters) for data entry, the available word count is indicated below.

You will be asked to provide the following:

1. Title of abstract [maximum 20 words].
2. Completed abstract [maximum 500 words]. Abstracts will be included in the conference proceedings and must be structured using the headings below.

Heading	Notes
1. Background:	What was the context for the study/project? Why was it important that this project was undertaken?
2. Purpose:	What was the major reason for undertaking the project? (A project may be a research study, developing a new or adapted programme, method, theory, or resource). Any secondary objectives?
3. Methods:	What principles, methods/methodological approaches, materials did the project involve?
4. Results:	Summarise the main findings from the analysis

-
5. Conclusion(s): What can be concluded from the study? What are the suggestions for future work?
6. Implications: What are the implications of the project and how will the results be translated into physiotherapy practice/management/education/policy
- No images, tables or graphs are permitted.
3. Funding acknowledgements: please acknowledge all funding sources that supported your work. If the work was unfunded, please state this [maximum 20 words]
4. Primary topic: Neurology, innovation and technology, mental health, pelvic floor, cardiorespiratory, musculoskeletal, paediatrics, geriatrics, palliative care, aquatics, occupational health and ergonomics, sports, global health and management, education.
5. Ethics approval [see general information point 11 below]: evidence that ethics approval was given is required. Please name the institution and ethics committee that approved your work or advised you that it was not required. Provide the ethical approval number or state the reasons why ethics approval was not required.
- Ethical approval is unlikely to have been required if your work:
- addresses new and unique developments in practice, theory, education, management, policy, and resources
 - describes innovative ways in which established methods have been adapted to meet the changing needs of practice
 - is a systematic or narrative review.
- The Council for International Organizations of Medical Sciences (CIOMS) in collaboration with the World Health Organization has developed the 'international ethical guidelines for health-related research involving humans' which provide examples of exemptions from review (see page 90) <https://cioms.ch/wp-content/uploads/2017/01/WEB-CIOMS-EthicalGuidelines.pdf>
- In these cases, please state N/A for institution and ethics committee, and complete the reason ethics approval was not required, giving as much detail as possible [500 words]
6. Speaker details and biography of presenting author [200 words]
7. Co-author details
8. Information concerning any presentations or publications of the work made prior to conference [50 words]

General information

1. The conference language is Spanish and presentations must be made in Spanish. Submissions can be made in English or Spanish. Translation will not be provided.
2. A written abstract in Spanish or English must be submitted for each proposed presentation.
3. It is the author's responsibility to submit a correct abstract. Any errors in spelling, grammar or scientific fact will be reproduced as typed by the author.
4. The topics selected will be used to inform the review, selection, and programming processes. Please choose the topic(s) that best describe the subject of your abstract that will attract the right audience to interact with you.

-
5. A person can only **submit and present** a maximum of **two** abstracts. They may be named as the presenting author on multiple **submissions** but will only be permitted to be confirmed as the **presenting author** on **two accepted** abstracts. Changes to the presenting author on accepted abstracts will be permitted. They may be named on other abstracts as a co-author.
 6. Only **one** presenting author per paper is permitted. Only an author may present the abstract. If no author is available onsite, the abstract will be withdrawn. Any changes to the presenting author must be notified directly to World Physiotherapy. Changes will be incorporated into the final programme if there is sufficient time, but thereafter no further changes will be reflected in the programme.
 7. Notification of outcome will be sent to the submitter. Please note that only the person who submits the abstract will receive correspondence concerning the abstract and is responsible for informing all authors of the status of the abstract.
 8. All presentations must describe original work to which all the authors listed have made a significant contribution. Any reference to personal experience should be clearly labelled as such.
 9. All proposals and presentations must adhere to the use of “people-first” language. A person must not be referred to by disability or condition, and terms that could be considered biased or discriminatory in any way should be removed (eg “person with a stroke” instead of “stroke patients”). See: www.disabilityisnatural.com/people-first-language.html for more information and examples.
 10. Any source of funding or support for the work being presented should be acknowledged.
 11. All presentations including research on humans (patients, carers, students, faculty, staff, colleagues) or animals must provide evidence that the research was carried out ethically (ie ethics committee approval, informed consent by subjects). To check that your research complies with ethical principles, please visit [South America region conference 2026 | World Physiotherapy](https://www.worldphysiotherapy.org/conferences/south-america-region-conference-2026)¹. See also the global international standards²

The SC expects the research to have been conducted in accordance with international principles.

12. Each abstract submission must indicate if the material has been or will be published, in any format, or presented at another national or international meeting before the World Physiotherapy South America region conference 2026. Abstracts will only be considered if they are unlikely to have reached a wider international physiotherapy audience in their previous presentation or publication, and if the authors take responsibility for providing any copyright clearance needed for inclusion in the conference proceedings or other conference publications.
13. **The author presenting the paper must register to attend the conference in-person and be available to participate in the programme at the time scheduled.**
14. The scheduling of all presentations will be determined by the SC to ensure best fit with the overall conference programme. Any requests for specific dates and times will not be considered. Similar abstracts in related topic areas will be grouped together for presentation.
15. PowerPoint presentation will be available in the conference rooms.
16. Presentations are not permitted to market new products, equipment, or organisations, or use the presentation time to challenge or criticise competitors’ products.

CIOMS and International Council for Laboratory Animal Science (2012) [International Guiding Principles for Biomedical Research Involving Animals](#).

-
17. All presentations during the conference must include the same content and follow the same outline as described in the submitted and accepted abstract.
 18. In keeping with World Physiotherapy policy, no honorarium, fee, or payment of expenses will be paid to speakers.
 19. All decisions of the SC are final.

Consent and permissions

In submitting an abstract, you must confirm that:

- you accept responsibility for the accuracy of the submitted abstract and understand that the content cannot be modified or corrected after the submission deadline and that **it will be published exactly as submitted**
- all co-authors are aware of and agree to the content of the abstract and support the data presented
- all speakers have agreed to participate at the conference, should the proposal be accepted for presentation, and take responsibility for their own travel, accommodation, and registration costs
- you accept responsibility as the contact person for all correspondence about the abstract and to share information with all authors about its status
- you have secured any copyright/permissions clearance required relating to any previous presentations, equipment, or other material for inclusion in the World Physiotherapy conference, its proceedings or other conference publications
- for all studies (including service evaluations and audits) involving human participants or animal subjects, permission has been obtained from the relevant ethics committee, where applicable, and properly informed consent given, where appropriate, both for the work completed and the intent to present
- anyone who is identifiable in the abstract and presentation has given their consent to be included
- the work is original, except for extracts from copyrighted works used with permission from the copyright holders, and it does not infringe upon any copyright, proprietary, or personal right of any third party
- you have identified any potential conflicts of interest eg financial interest in products or processes described in the abstract, stock ownership, membership on an advisory board or board of directors, or other substantive relationships

Copyright

On behalf of any and all co-authors, the submitter will confirm the:

- consent to have authors' names, affiliations and biographical materials used in connection with the publication of your work
- content belongs to the author(s). However, if the abstract is accepted, the submitter agrees, on behalf of all co-authors, to transfer and assign to World Physiotherapy free of charge, on a non-exclusive basis, the rights to edit, publish, reproduce, reformat, distribute in whole or in part the abstract and prepare all type of derivative works. These works may include press releases, recordings, and/or educational products, using all communication tools and means, now known or hereinafter developed, including any and all analogue and digital means and any and all supports or forms of media, now known or hereinafter developed. This includes use in indexes or search databases in print, electronic, or other media

-
- author(s) retain the right, after presentation, to subsequently include the work in articles, books, or derivative works that they author or edit, provided said use does not imply the endorsement of World Physiotherapy
 - the author(s) will retain copyright of their abstract. However, the author shall only reuse, reproduce or post the abstract with acknowledgment to the initial and first publication or presentation at a World Physiotherapy regional conference, and therefore reference the name of the World Physiotherapy event and the date.

Good research practice when using generative AI

World Physiotherapy and the scientific committee support the transparent and responsible use of generative artificial intelligence (AI) in research.

We expect abstract submitters to abide by the key principles set out by the European Commission's [Living guidelines on the responsible use of generative AI in research](#).

- Reliability in ensuring the quality of research, reflected in the design, methodology, analysis and use of resources. This includes aspects related to verifying and reproducing the information produced by the AI for research. It also involves being aware of possible equality and non-discrimination issues in relation to bias and inaccuracies.
- Honesty in developing, carrying out, reviewing, reporting and communicating on research transparently, fairly, thoroughly and impartially. This principle includes disclosing that generative AI has been used.
- Respect for colleagues, research participants, research subjects, society, ecosystems, cultural heritage and the environment. Responsible use of generative AI should take into account the limitations of the technology, its environmental impact and its societal effects (bias, diversity, non-discrimination, fairness and prevention of harm). This includes the proper management of information, respect for privacy, confidentiality and intellectual property rights, and proper citation.
- Accountability for the research from idea to publication, for its management and organisation, for training, supervision and mentoring, and for its wider societal impacts. This includes responsibility for all output a researcher produces, underpinned by the notion of human agency and oversight.

When completing the online submission process the submitter will be asked to confirm that the presenting author has read and understood the general information and the requirements they are expected to fulfil.
